DETAILED ACTION

Response To Restriction

Examiner presently acknowledges Applicant's Election of claims 1-3 with traverse, in correspondence dated 1/17/03. However, after further consideration, the examiner hereby withdraws restriction requirement and will examine all claims 1-8.

Specification

The disclosure is objected to because of the following informalities:

On page 1, line 15, change "mus" to ---must---.

On page 1, line 26, change "priori" to ---priority---.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2826

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Xie.

Referencing Figures 2A-2D, Xie discloses an integrated circuit of reduced parasitic capacitive influences provided with an insulating layer (115) buried in the semiconductor substrate (100), characterized by the insulating layer (115) being at least 5 um thick (i.e. 200 um) and is locally restricted to specific areas of the integrated circuit (i.e. under the inductor (130)). (Column 3, line 34 – Column 4, line 43.)

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4-8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2826

Claim 4 as substantially written in its entirety is neither anticipated by nor obvious over the prior art of record. Likewise, claims 5-8 are also allowable as being dependent upon allowable claim 4.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yuan, Lee et al. and Omura et al. each disclose semiconductor devices made to reduce parasitic capacitance.
